*Best Patrolling, Hiking and Protection Gear for Army*

## Stun Walker

Stun Walker is a multipurpose solar powered smart stick that can be used in tough terrains like mountaineering and forest trails. This stick can be used emergency situations as a safeguard and self-defense against the uncertain wild attacks.

During patrolling in outskirts areas, there is a high risk of attack from the predators specially in the forest, mountain ranges, snow clad, uncertain terrain, etc. So to help the people visiting such a geological terrain of high risk and lack of communication from main stream, Solar Basket™'s stun walker has been designed. The Objective is to carry a device with ease and comfort for safety, which supports in difficult terrain with SOS functionality and basic medical aid.

The Stun Walker is divided in 3 parts. The upper part of the stick is called as head. It contains solar panel, 3-mode tactical torch, button operated LED light, siren & S-O-S signal facility. The middle part of the stick contains first aid kit & the bottom part of the stick has stun & trekking tool.
